

# ZOLLERN

Solid metals. Fine solutions.

Forging

Pure copper  
and copper  
alloys

### **The ZOLLERN-Group**

With first-class products and customized solutions in the sectors drive technology, investment casting, sand casting and forging as well as steel profiles we are one of the leading manufacturers – worldwide.

As one of the oldest family-run businesses in Germany we are proud to look back on an impressive 300-year history during which we have merged tradition with innovation. Our main focus is on excellent quality and service.

Welcome to the world of ZOLLERN, where experience and progress go hand in hand to offer our customers the best solutions and products for their requirements in various industrial sectors.

# Forging

## Superior quality forging

ZOLLERN has been active in the area of non-cutting metal forming of copper and copper alloys through forging for more than 100 years. In the meantime, the transformation from purely manual production of the past to industrial production has been consummated. Today, forgings and semi-finished products are manufactured through the use of forging hammers, a hydraulic forging press with 1,600 t compressive force, a stretching machine, as well as with a ring-rolling mill. The required ingoing material is largely produced in-house.

Equipped with highly modern CNC machines, our machining workshops manufacture pre-processed or finished single or volume production parts from forgings or semi-finished products according to customer drawings.

In the laboratory and materials inspection, all standard destructive and non-destructive tests and examinations are available. Production is certified according to DIN EN ISO 9001 : 2015. For us, quality and delivery reliability are the prerequisites for success on the national and international market.

## Product areas

### Metals and shaping

#### // Investment casting parts

- Turbine components
  - Vanes / Blades / Shrouds / Heat Shields
- Structural Castings
  - Gas Turbines / Aero / Engines Defense / Medical / Industrial Components
- Automotive
  - Turbine Wheels / Waste gates / Vanes / Pins / Planet carriers
- Implants
  - Knees (Femur, Tibia) / Hipps
- Alloys
  - Super alloys / Cobalt Chrome alloys

#### // Sand casting parts

- Sand casting
- Croningguss / Maskenguss
- Ceramic casting
- Continuous casting
- Centrifugal casting

#### // Forgings

- Forgings made of pure copper and copper alloys
- Semi-finished products, open die forged, flat bars, round bar
- Drop forged parts
- Rings, seamlessly rolled
- Bushings, seamlessly forged
- Individual pieces, small series, large series

#### // Special profiles and finished parts

- Special profiles, coils, bars
- Customer-specific finished parts
- Profile types hot-rolled, cold-rolled, cold-drawn, induction-hardened

## Drive technology and automation

### // Gearboxes

- Travel drives
- Slewing gearboxes
- Winch gearboxes
- Industrial gear units
- Gearboxes for tunnel boring machines
- Sugar mill gearboxes
- Electric drive systems
- Condition Monitoring and Predictive Maintenance

### // Winches

- Hoisting winches
- Free fall winches
- Pull winches
- Rescue boat winches
- Winch systems
- Winch gearboxes

### // Electric motors

- Torque motors kits
- Synchronous motor kits
- Synchronous motor modules

### // Automation, special systems

- Linear units, linear modules, gantry axes, portal units
- Telescoping axes
- Rotary modules, rotary tables
- Line gantries, area gantries
- Robot traverse axes, jig axes
- Storey lifter and lifting columns
- Fast conveyor
- Framing tenter handling / overhead systems
- Storage systems
- Complete systems with steel construction and control
- Special solutions
- Gripper

### // Hydrostatic bearing systems

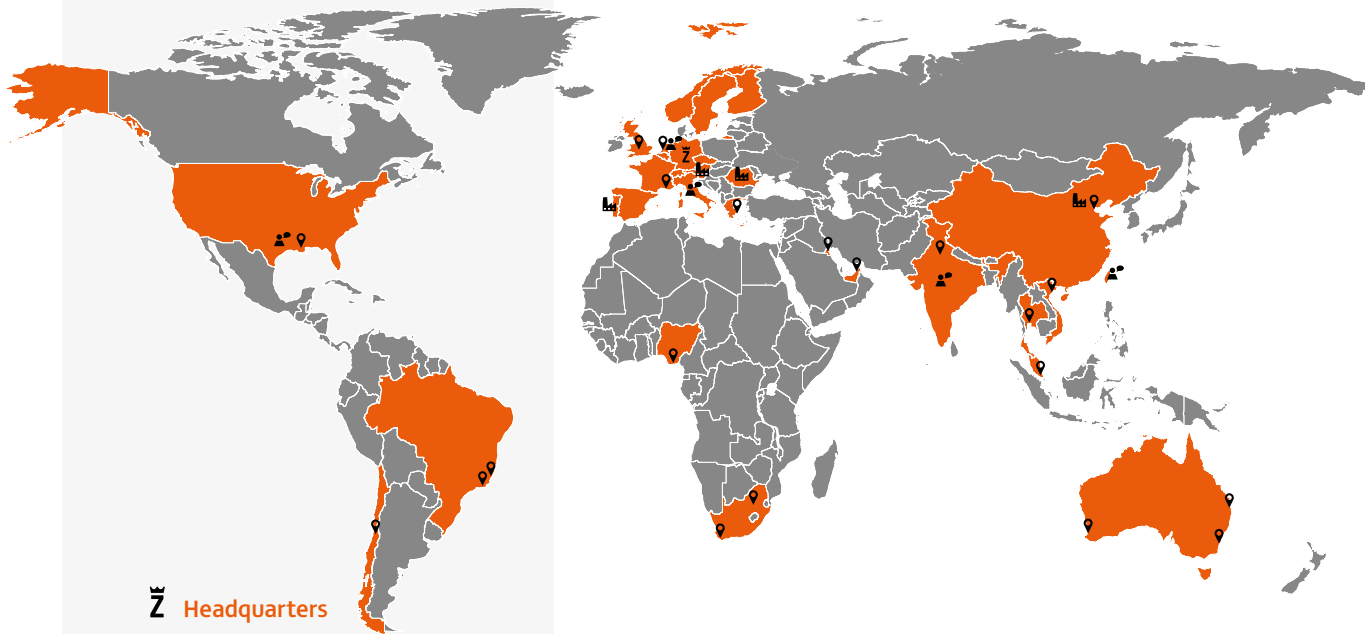

- Hydrostatic spindles
- Hydrostatic rotary tables
- Combined radial-axial bearings
- Hydrostatic guides
- Hydrostatic bearing segments for rotary tables
- Testing and special applications
- Hydraulic units

### // Rotary table systems, service

- Hydrostatic rotary tables
- Aerostatic rotary tables
- Roller bearing mounted rotary tables
- Rotary tables of Rückle, Eimeldingen
